For many in the West, Chinese contemporary art is synonymous with the political realist painters of the 1980s and 90s, who recycled the styles of communist social realism with pop cynicism. This book examines the different modes of production, artist groups, market systems and infrastructure that shape artistic production in China. This book provides information and suggestions for solo traveling mixed with stories from the author’s own experiences.

This book summarizes current knowledge on chronic lymphocytic leukemia (CLL), taking into account the most recent research. All aspects are considered, including pathophysiology, clinical presentation, diagnosis, prognosis, treatment, follow-up, and complications and their management. Readers will find important information on the various prognostic markers as well as practical guidance on the use of different
diagnostic procedures. A key focus of the book is the changing treatment paradigm in CLL as progress in understanding of pathogenesis and pathophysiology leads to the identification of new potential therapeutic targets. General treatment concepts are clearly described, and it is explained how choice of treatment for CLL depends on stage, age, and performance status as well as specific genetic aberrations. In addition, frontline therapeutic strategies for disease relapse, including allogeneic stem cell transplantation, are reported. Looking beyond CLL, the diagnosis and therapy of T-cell prolymphocytic leukemia and T-cell large granular lymphocyte leukemia, two rare CLL-related entities, are addressed.

The scope and importance of hip fractures is almost incomprehensible. With a world wide incidence of close to 2 million cases per year, these fractures pose a daunting challenge to our ability to affect and treat this epidemic. The incidence of these fractures is predicted to grow to 6 million in 2050 including a near term baby boom spike. Add the hospital mortality rate of up to 4% and the one mortality of from 8% to 20% and the life ending effect of these fractures becomes a glaring reality. Of those who initially survive their fracture, about 50% never walk the same again. The social problem in the care of these elderly people is enormous. Of course, any real solution to this problem will include education, prevention, surgical and hospital treatment protocols, long term rehabilitative efforts, social adjustments and a generous contribution of money. This publication is primarily directed to the amplification of a new treatment modality that addresses only a fraction of the problem. It is, however, a quantum leap in the evolution of fixation with compression hip screws which are still the gold standard for surgical stabilization of pertrochanteric hip fractures. The Dynamic Martin Screw (DMS) addresses the issue of adjustability of the fixation angle with appropriate mechanical strength characteristics that were lacking in its historical predecessors.

Although bell hooks has long challenged the dominant paradigms of race, class, and gender, there has never been a comprehensive book critically reflecting upon this seminal scholar's body of work. Her written works aim to transgress and disrupt those codes that exclude others as intellectually mediocre, and hooks' challenge to various hegemonic practices has heavily influenced scholars in numerous areas of inquiry. This important resource thematically examines hooks' works across various disciplinary divides, including her critique on educational theory and practice, theorization of racial construction, dynamics of gender, and spirituality and love as correctives in postmodern
life. Ultimately, this book offers a fresh perspective for scholars and students wanting to engage in the prominent work of bell hooks, and makes available to its readers the full significance of her work. Compelling and unprecedented, Critical Perspectives on bell hooks is a must-read for scholars, professors, and students interested in issues of race, class, and gender.

Domestic bulk liquefied petroleum gas (LPG) is used by almost 150,000 households in the UK, mainly in rural areas situated away from the mains gas grid, and its higher price compared to natural gas reflects in part the need to deliver LPG by tanker. It is a hazardous product, and as safety issues are of key concern, its supply is subject to a legislative regime supplemented by voluntary codes of practice and by the suppliers' own practices. The four major suppliers in the market for domestic bulk LPG are BP, Calor Gas, Flogas and Shell Gas. The Commission's report finds that there a number of features which adversely affect competition in the market, including lack of information available about switching suppliers, the inconvenience involved and lack of transparency in prices; as well as evidence of barriers to the entry and expansion of smaller suppliers to the market. The report recommends the implementation of a package of measures to remedy this situation, including in relation to the practice of uplifting and replacing gas tanks when a customer switches supplier; standardised information on the switching process; and changes to customer contracts including notice periods.

Private Histories is John Webber's first collection of poetry and one of the first to be published by UKA Press. A mixture of modern and traditional verse, it draws on influences as diverse as Shakespeare, Spike Milligan and Carol Ann Duffy. The personal is punctuated with the humorous and there are some quite original portraits of historical events and characters. Each poem reveals different facets of everyday life, whether ordinary or extraordinary, that go to make up the private histories of our own experience, past and present.

Four of the plays in this volume are based on important source materials, so that the relationship of plays to sources looms large in Cyrus Hoy's introductory essays. There is an extensive account of the relation of The Shoemakers' Holiday to Deloney's Gentle Craft. The Introduction to Old Fortunatus relates in detail that play's relationship to the German Volksbuch, and to the German Comoedia von Fortunate und seinem Seckel und Wünschhütlein (1620), a redaction of Dekker's play. The Introduction to Patient Grissil relates Dekker, Chettle and Haughton's play to the tradition of the Griselda story generally. The chronicle-history sources (Foxe, Grafton, Stow, Holinshed) of Sir Thomas Wyatt are surveyed in the Introduction, in his Introduction also, Professor Hoy considers
the play's relationship to the lost play, Lady Jane, by Dekker, Chettle, Heywood, Webster and W. Smith. Satiromastix has no known source, but as Dekker's contribution to the stage quarrel of Marston and Jonson, this is a play that has always had particular interest for the student of Elizabethan theatrical history, and Professor Hoy therefore bestows on it the most elaborate Commentary in all these four volumes.
